## **INSTRUMENT PENELITIAN**

### **“THE EFFECT OF USING AUDIO MEDIA ON THE STUDENTS’ ENGLISH VOCABULARY SKILL AT SMP N 2 BERASTAGI”**

Researchers in this study used qualitative methods to collect and transmit data. Qualitative methods are useful in testing goal theory by testing the relationships between variables. These variables can be measured and analyzed using description procedures. This research uses an observation and quasi-test design to determine the effectiveness of using Audio Media on the vocabulary abilities of class VIII students at SMP N 2 Berastagi.

Researchers will take one class to collect samples, namely class VIII-3. In this design, one class is used. In this research, researchers used test and documentation techniques, and observation. Researchers will carry out several stages for this research, the first test uses audio media to find out how far students' vocabulary abilities in class VIII-3 are. Next, the researcher will make observations after implementing the use of audio media in English language learning at SMP N 2 Berastagi. Next, the researcher will take action in the classroom and finally the researcher will carry out a second test as the final research result of the use of audio media on students' comprehension abilities at SMP N 2 Berastagi.

**For the Cycle 1 test the researcher use 1 song as a test to the students VIII-  
3 the title is Favorite Girl by Justin Bieber.**
