## ***ABSTRACT***

**IRA ENJELINA BR PURBA, NPM : 1915010087 “IMPROVING STUDENT LEARNING RESULTS USING THE MAKE A MATCH MODEL IN SCIENCE THEME 3, SUBTEMA 1 CLASS IV SD NEGERI 040523 SUKANALUSCHOOL 2022/2023 ACADEMIC YEAR”  
BERASTAGI QUALITY UNIVERSITY STUDY PROGRAM THESIS IN 2023.**

This research is a classroom action research (CAR). The problem in this research is the low student learning outcomes in science subjects in class IV. This is because the implementation of learning is still teacher-centered. The purpose of this study was to improve the implementation of learning by using the make a match model in the Science subject, theme 3, sub-theme 1, SD Negeri 040523 Sukanalu, Academic Year 2022/2023.

The subjects in this study were all fourth grade students at SD Negeri 040523 Sukanalu for the 2022/2023 academic year, consisting of 24 students. The object of this research is the use of the Make a Match model to improve learning outcomes in Science subject, Theme 3, sub-theme 1. The test used is multiple choice questions, totaling 10 questions and observation sheets of teacher and student activities.

The results of the implementation of cycle I learning obtained data from observations of teacher activity 59.3% in the sufficient category, 60% student activity in the sufficient category, 71% classical completeness, and the average value of 69. whereas in cycle II the results of observations of teacher activity were 80.3% in the good category and 80% student activity in the good category, with 87% classical completeness, the average value was 87.

From the results of this study it can be concluded that the Make a Match Model can increase teacher activity and student activity and can improve student learning outcomes in the Science subject, theme 3 sub-theme 1 class IV SD Negeri 040523 Sukanalu Academic Year 2022/2023.
